

1. Real-Time Messaging

- What it does: Allows instant communication between students, parents, teachers, and administrators within the platform. It includes group chats, direct messages, file sharing, and read receipts. Parents can directly message teachers to discuss their child's academic progress, attendance, or behavior.
 - Who it touches: Students, parents, teachers, and administrators.
- Why it's important: It centralizes all school communication, removing the need for external apps like Telegram or WhatsApp. It ensures faster collaboration, provides parents with direct access to teachers, and keeps all conversations secure and organized.

2. Timetable and Attendance Management

- What it does: Enables students, teachers, and administrators to create, view, and manage academic schedules. It includes adding events (classes, exams, study sessions, school activities), setting reminders, and viewing schedules in daily, weekly, or monthly formats.
 - Who it touches: Students, teachers, and administrators.
- Why it's important: It helps students stay organized, avoid scheduling conflicts, and keep track of academic activities. Teachers and administrators can easily manage and share schedules with the entire school community.

3. Fee Management (Payment page)

- What it does: Digitizes the entire school fee collection process. Students and parents can view fee balances, payment history, and download invoices. Administrators and finance officers can track payments, generate invoices, record payments, and send automated reminders for overdue balances.
 - Who it touches: Students, parents, administrators, and finance officers.
- Why it's important: It eliminates manual tracking, reduces administrative errors, and improves transparency. It ensures timely fee collection and provides parents and students with a clear view of their financial status at all times.
